

STORM SYSTEM®

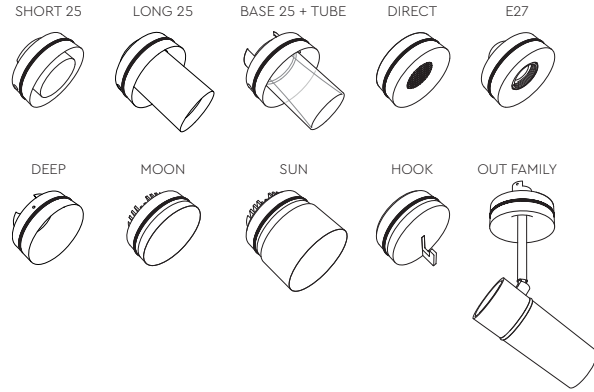

The Danish design company ONE A innovates and produces architectural lighting and smart-technology products with a minimalistic expression to create visual harmony in any living environment.

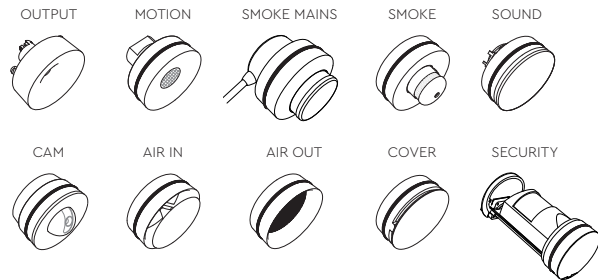

STORM SYSTEM® is a range of light- and smart home products for walls and ceilings, available in two sizes: Medium and Small. Known for its elegance, extremely high manufacturing and handcrafted details – without compromise.

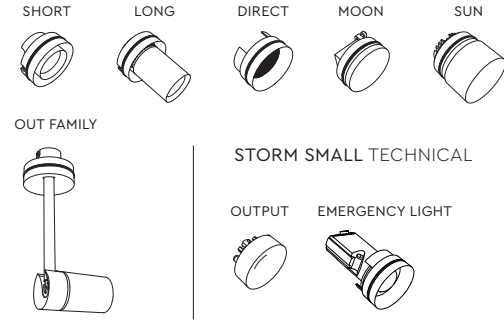

STORM MEDIUM LIGHT

STORM MEDIUM TECHNICAL

STORM SMALL LIGHT

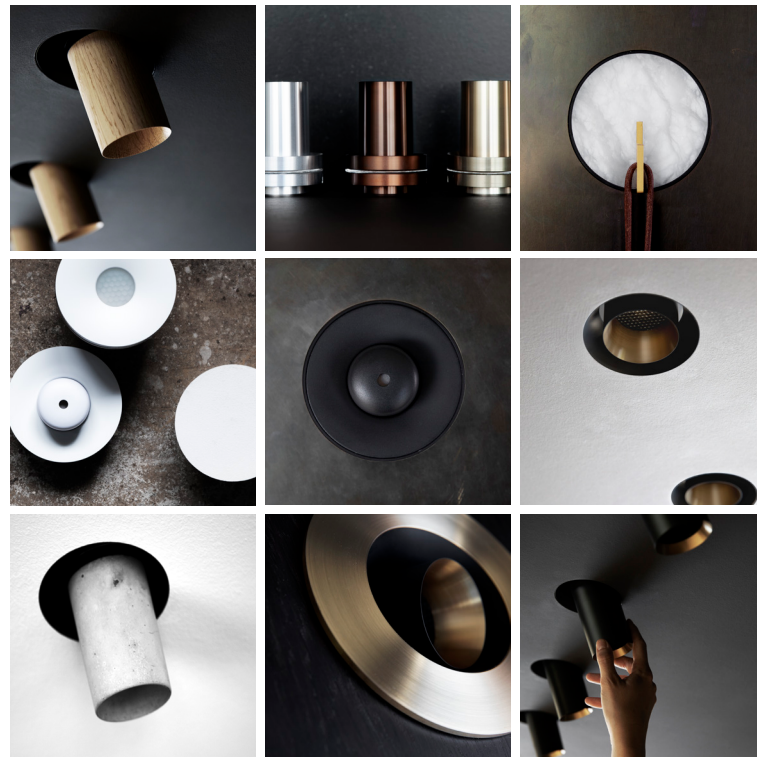

The core of the design lies in the mounting system. All products are designed to fit into the same mounting ring, and it is easy to change one component with another, leaving you with an extremely flexible system. The entire collection is carefully designed to flush the surface of any ceiling or wall.

STORM SYSTEM® is developed with a desire to create the finest and most beautiful surfaces within architecture.

STORM SYSTEM® offers a variety of different products, whether you need lighting, smoke detectors, motion detectors, speakers, outputs or ventilation.

STORM SYSTEM® exist at the meridian where craftsmanship, design and smart technology meet.

Private residence | Daluz Gonzalez Architekten + Design Centrum | Storm Medium Short 25, Storm Medium Base Tube

Private residence | Daluz Gonzalez Architekten + Design Centrum | Storm Medium Long 25

STORM SYSTEM® includes a multitude of lighting products in Ø89 and Ø61. The lighting products are available in a large variety of finishes and materials – in aluminium, brass, oak, glass, concrete and/or alabaster.
